

Unlock EA Value Faster with the LeanIX Meta Model

The LeanIX Meta Model covers all layers of Enterprise Architecture. It empowers businesses to keep their data structured across 4 key dimensions for end-to-end business transformations, including Strategy & Transformation, Business Architecture, Application & Data Architecture, and Technical Architecture.

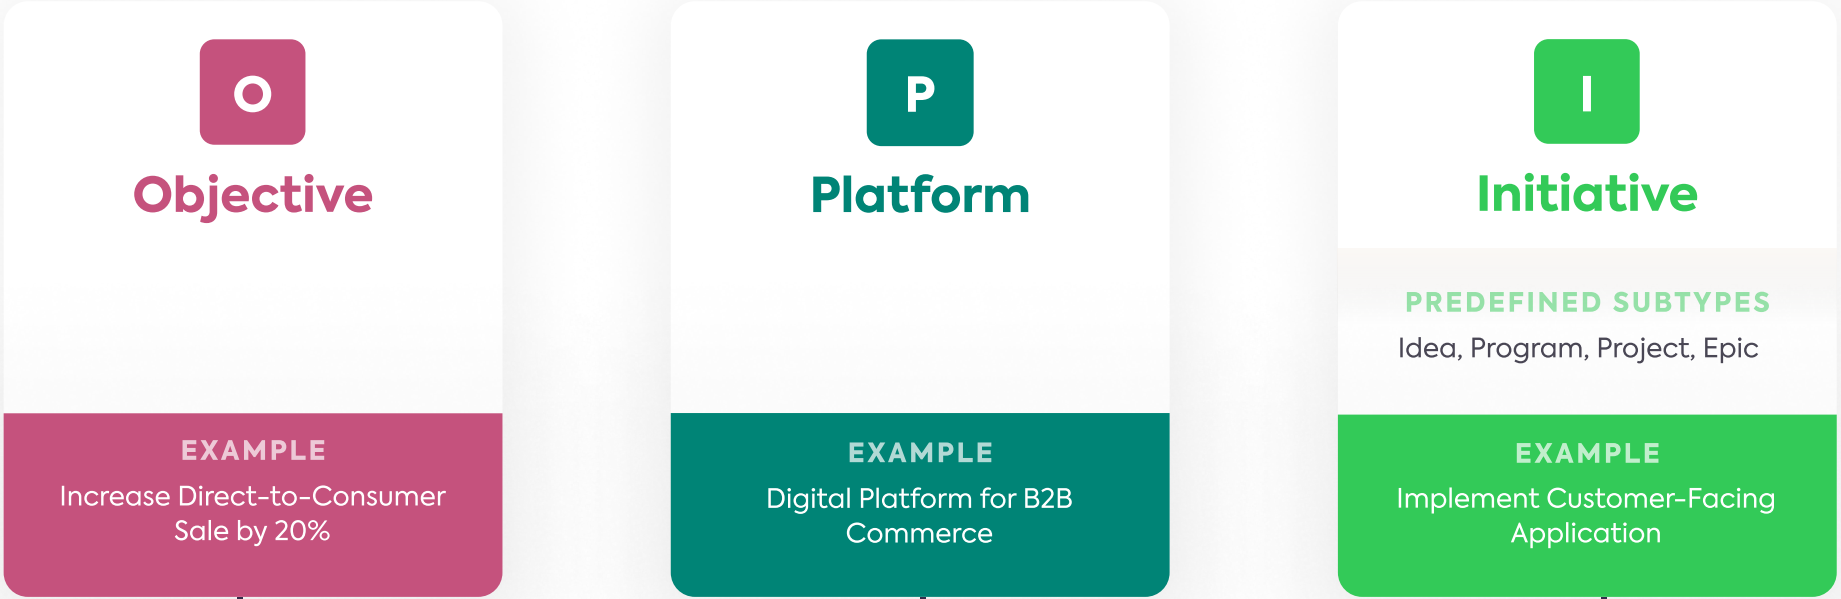

With a pre-defined Meta Model, organizations can unlock fast time-to-value, quickly turning data into insight, insight into action, and action into results.

Take a deeper dive into the LeanIX Meta Model, get familiar with clear modeling guidelines, and learn about all the essential details!
